1. Intro

This is a Demo Report. All data used is solely for Demo purposes.
Weekly NOCaaS report
Customer : Demo-customer 1

2. Executive Summary

2.1. Overview

--

2.2. Inventory

Host	Interface	Templates
Zabbix server	ZBX 127.0.0.1:10050	• Zabbix server health
web01	ZBX 10.0.2.1:10050	• Linux by Zabbix agent • Redis by Zabbix agent 2 • Nginx by Zabbix agent active
prd-repeng01	ZBX 10.0.2.1:10050	• Linux by Zabbix agent • Nginx by Zabbix agent • Redis by Zabbix agent 2 • PostgreSQL by Zabbix agent 2 • PHP-FPM by Zabbix agent
dev-repeng01	ZBX 10.0.2.1:10050	• Linux by Zabbix agent • Nginx by Zabbix agent • Redis by Zabbix agent 2 • PostgreSQL by Zabbix agent 2 • PHP-FPM by Zabbix agent
chfw01	ZBX 10.0.3.254:10050	• Linux by Zabbix agent

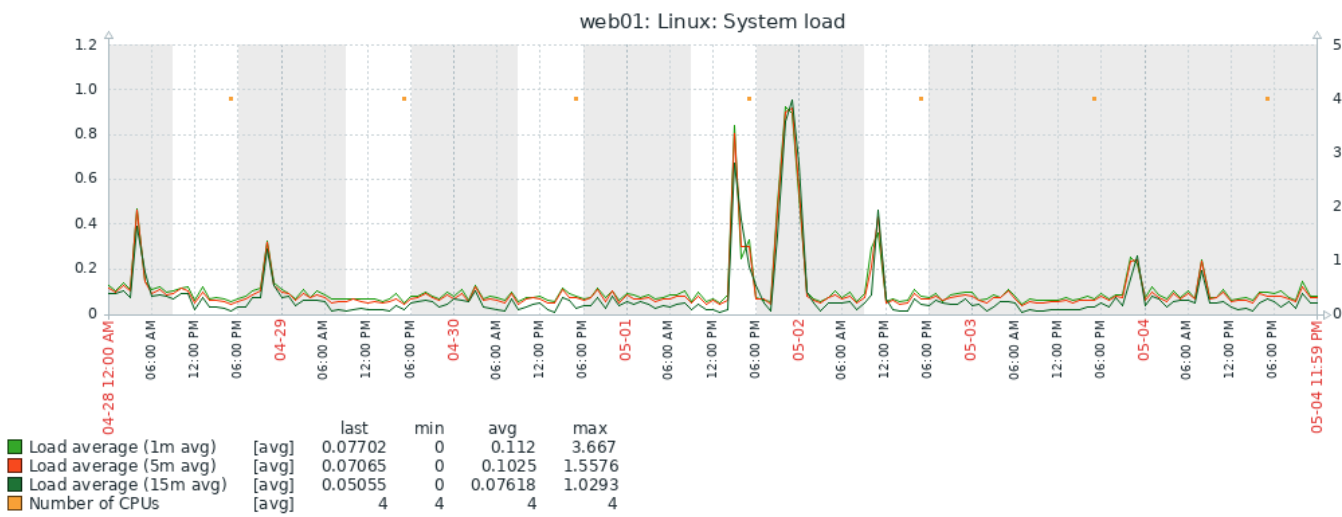

3. WebServer

Service status

Lowest value: 1

Peak value: 1

3.1. Webserver System Load

4. Firewall

4.1. FireWall Load

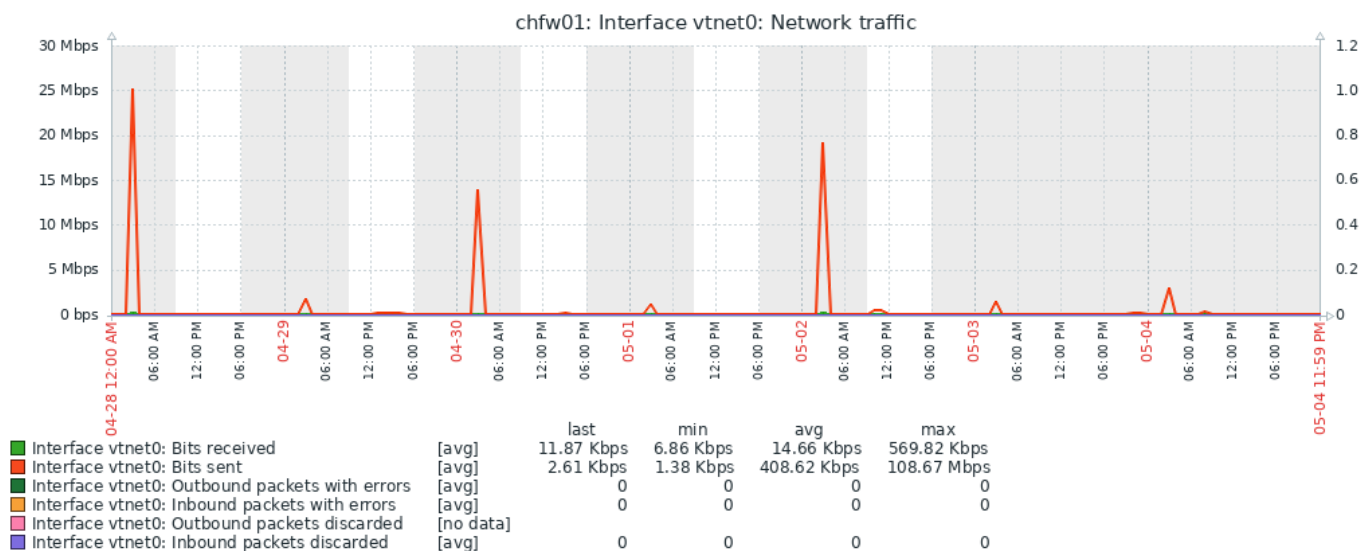

Load average (15m avg)

Lowest value: 0.0752

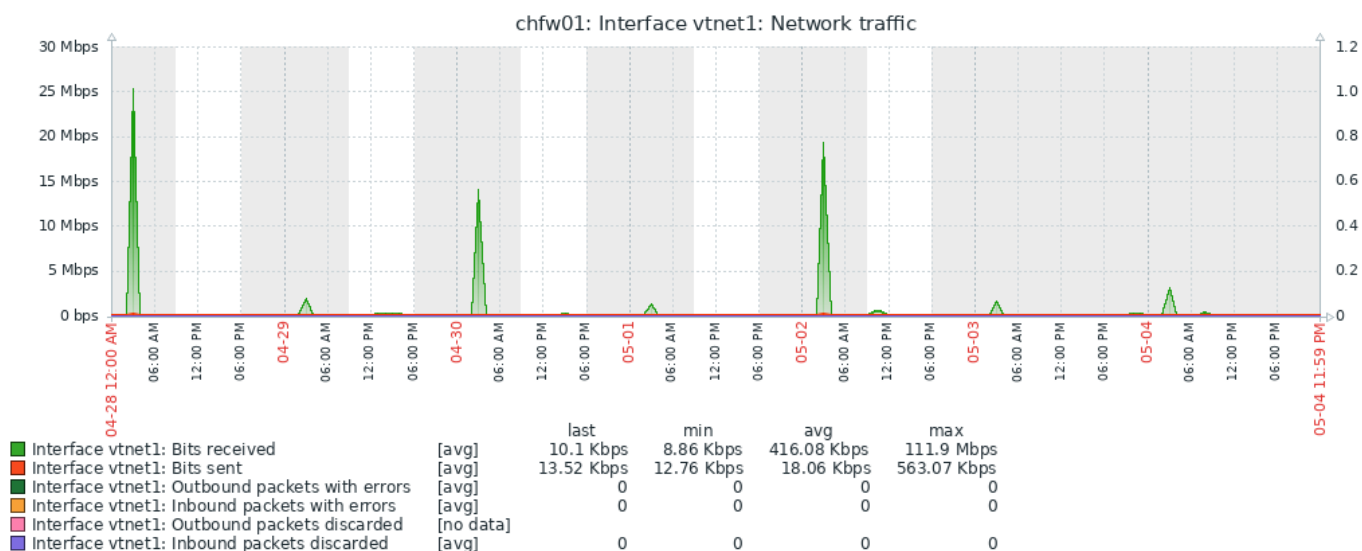

Average value: 0.2016

Peak value: 0.4849

4.2. Firewall throughput (vtnet0)

4.3. Firewall throughput (vtnet1)

5. DevServer

5.1. CPU utilization

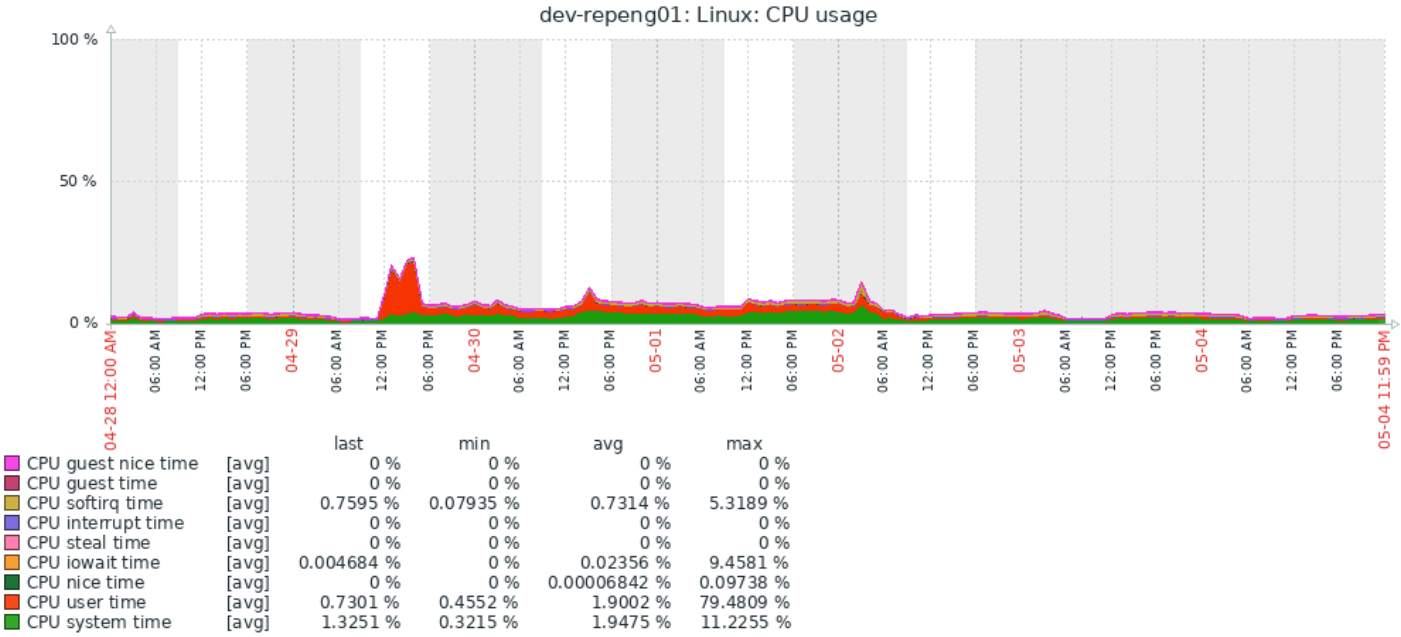

CPU utilization

Lowest value: 0%

Average value: 0.1163%

Peak value: 19.4%

5.2. CPU Usage

5.3. Memory Usage

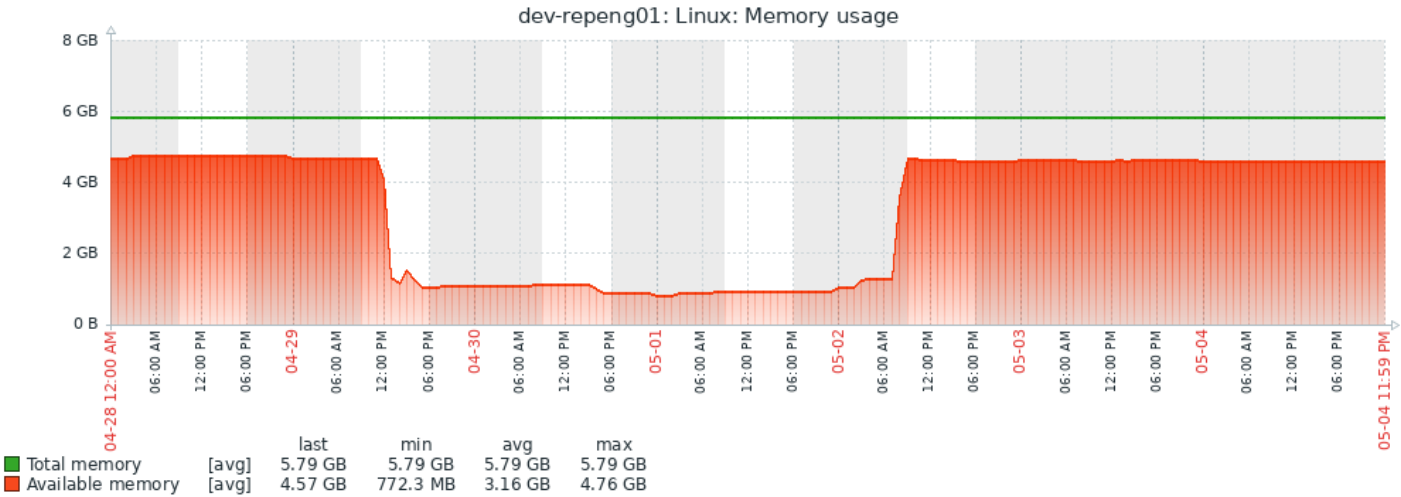

Memory usage, %

Lowest value: 3.8255%

Average value: 4.5407%

Peak value: 5.1334%

5.4. Memory Usage

6. Incident Management

6.1. All Incidents

Host	Description	Severity	Count
dev-repeng01	Linux: High swap space usage	Warning	3

If blank, no error occurred during the reference period.

7. Recommendations

7.1. Performance

7.2. Security
